Usage of local terminals … in 10 minutes … on 1 slide …

- Login with the 'trcray?' UID and **System password** given on the letter addressed to you.

- From the 'Chameleon' (down left corner) open a Konsole (Terminal). From this terminal you can '*ssh –X cca*'.

  - Editors available on cca are '*vi*', '*gvim*', '*gedit*', '*xedit*', '*emacs*'.

- The printer is available on your desktop and on cca:

  '*lpr –Pps_classroom <filename>*'

- Start Firefox. Go to 'www.ecmwf.int'. Login with your 'trcray?' UID and the **Web password** shown on the letter. Let Firefox remember this password. Then go to 'software.ecmwf.int' and search for 'hpcf'. Select the hpcf training page, which is the 'home' for this course.

- You can start '*~trx/view_slides*' or '*~trx/view_demo*' to follow on your desktop what is shown on the two terminals used by the lecturer.

- Before leaving in the evening, remember to **lock** your login session and to exit '*qsub –I*' sessions on cca. No need to switch your desktop system off.
